Hawks Legal

15 March 2023

Here you can see the automatic pronoun switching:

The cat belongs to John Doe, whose date of birth is 01 January 1985.

This cat is his.

This is his cat.

The cat was assigned to him.

He did not find the cat himself.

Here you can see the table of authorities goes to the next page and is automatically sorted alphabetically by case name:

**Table of Authorities**

Kaigler v. General Elec. Mortgage Inc. Corp. 961 S.W.2d 273 (Tex. App.—Houston [1st Dist.] 1997, rev'd on other grounds).

Lockheed Martin Corp. v. Gordon, 16 S.W.3d 127 (Tex. App.—Houston [1st Dist.] 2000, pet. denied).

Northland Indus. v. Kouba, 620 S.W.3d 411 (Tex. 2020, rev'd on other grounds).

**I. Sections are automatically numbered.****This is the first citation:**

Northland Indus. v. Kouba, 620 S.W.3d 411, 413 (Tex. 2020).

This is an *Id.* to a different page number:

Id. at 412.

This is an *Id.* to the same number with the *see* signal.

See id.

This is the second citation without a pin cite:

Lockheed Martin Corp. v. Gordon, 16 S.W.3d 127 (Tex. App.—Houston [1st Dist.] 2000).

This is a short form from the first citation:

Northland Indus. v. Kouba, 620 S.W.3d 411, 412 (Tex. 2020).

This is a short form from the second citation with a pin cite:

Lockheed Martin Corp. v. Gordon, 16 S.W.3d 127, 130 (Tex. App.—Houston [1st Dist.] 2000).

This is a short form from the second citation without a pin cite, again:

Id. (I think this is technically correct, but probably ill-advised)

This is the first citation without a pin cite:

Northland Indus. v. Kouba, 620 S.W.3d 411 (Tex. 2020).

This is the first citation again with a pin cite:

Id. at 411.

This is the third citation:

Kaigler v. General Elec. Mortgage Inc. Corp. 961 S.W.2d 273, 275 (Tex. App.—Houston [1st Dist.] 1997).

II. Labels and refs.

You can use `\label` and `\ref` to refer to other parts of a document dynamically.

Ex.

The third citation was in Section I. It was on page 3.

If I move that section later, both of those will automatically update to be correct. I find this useful for contracts.
